AGUA FINITA | Solar agriculture, productive work and a compact city

A coordinated territorial proposal / source boundary and seasonal channels retained / V13 public working preview

SOUTHWEST / FUNCTIONS AND STREET NETWORK

- Z1 Southwest city + services
- Z2 Agricultural research
- Z3 Solar-agriculture opportunity
- Z4 Production + transfer
- Z5 Gateway + logistics
- Z6 Mountain stewardship

TERRITORY -> SOUTHWEST ENLARGEMENT -> PUBLIC LIFE

Photovoltaic fields and under-panel forage / jojoba lead the territorial programme. Compact industrial halls use modular construction and shared infrastructure. Future field opportunities depend on water, grid, demand and detailed engineering; the plan does not claim those resources are secured.

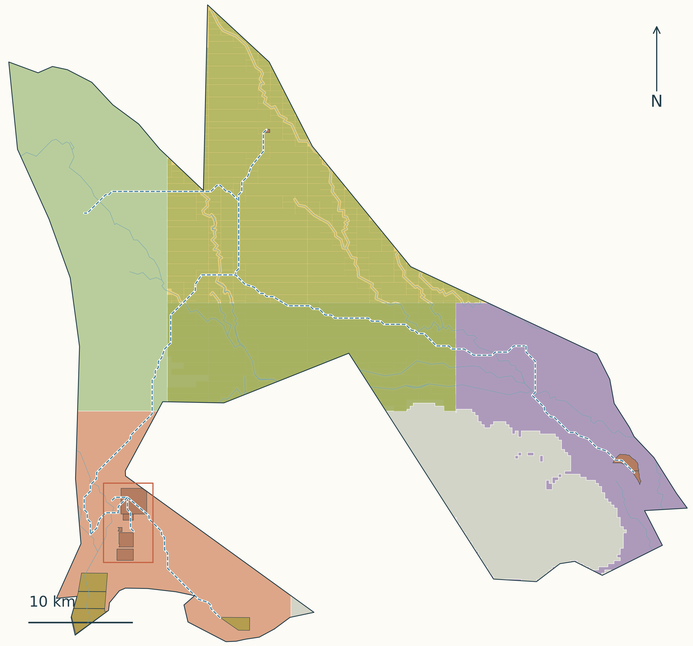

The same city, read through its systems

Planning structure, functions, roads, ecology, land use and public-service anchors

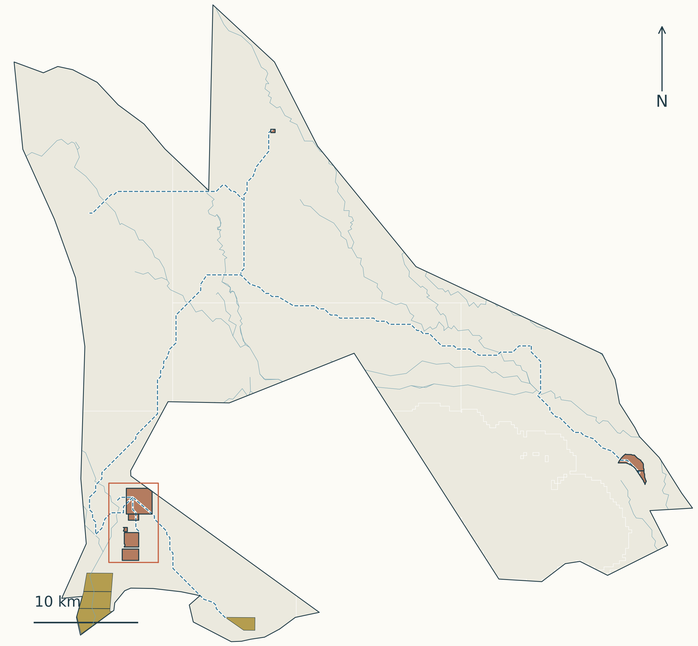

01 Structure

02 Functional regions

03 Regional movement

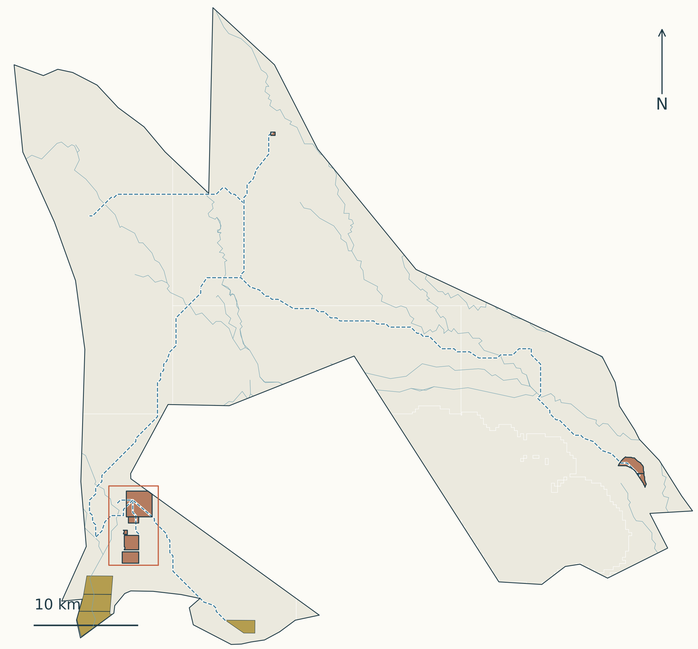

04 Drainage and retained landscape

05 Conditional production land

06 Service anchors

Strategic diagrams are territorial. Detailed public-service provision and local roads are shown in the southwest enlargement; reservations elsewhere are not operating settlements.
